

The first part of the report, which covers the period from the beginning of the year to the end of the first quarter, shows a steady increase in the number of cases reported. This increase is attributed to a combination of factors, including a rise in the number of new infections and a decrease in the number of recoveries. The overall trend is one of growth, which is consistent with the data reported in the previous year.

The second part of the report, which covers the period from the beginning of the second quarter to the end of the year, shows a similar pattern of growth. The number of cases continues to rise, and the overall trend remains positive. This is due to a continued increase in the number of new infections, which is offset by a decrease in the number of recoveries. The data indicates that the situation is stable and that the number of cases is expected to continue to rise in the coming year.
